239 experts with one big claim: The coronavirus is airborne

In an open letter to the World Health Organization (WHO), 239 scientists in 32 countries have outlined the evidence showing that smaller respiratory particles—not just large droplets—can infect people with the novel coronavirus. The scientists and are calling for the agency to revise its recommendations.

- Our objective is to ensure that residents of our building can avoid exposure to bad germs by following CDC guidelines.
- Transmission of SARS-CoV-2 through the air is sufficiently likely that airborne exposure to the virus should be controlled. Changes to building operations, including the operation of HVAC systems can reduce airborne exposures.
